

Coming alive  
I turn on the radio  
Nothing I like  
And if I wouldn't like to know  
But for a couple of nights  
I listened to the same old song  
It's stuck in my mind  
But I would like to let go

Give me the best you can  
Come reach all your potential  
But nothing gets in my way  
When I'm running in circles  
Back where I started off  
And a couple of us got lost  
While following a straight line  
I keep running in circles

Open my eyes  
Blinded by the morning light  
I put on my clothes  
An ache is burning deep inside  
And for a couple of days  
I've been wearing just the same  
I am falling behind  
But I can say I'm just fine

Give me the best you can  
Come reach all your potential  
But nothing gets in my way  
When I'm running in circles  
Back where I started off  
And a couple of us got lost  
While following a straight line  
I keep running in circles

Open my eyes, open my eyes I just wanna see it  
I'm falling behind, open my eyes I'm blinded by the morning light

Give me the best you can  
Come reach all your potential  
But nothing gets in my way  
When I'm running in circles

Back where I started off  
And a couple of us got lost  
While following a, following a ...  
I keep running in circles
